ABOUT THE PROGRAMME

The Master of Education (M.Ed.) is a graduate-level programme designed to prepare educators to become effective practitioners, instructional leaders, and agents of change. The programme emphasises advanced knowledge of teaching and learning, educational research, curriculum development, technology integration, leadership, and the integration of theory into real-world educational practice.

SPECIALISATIONS

Students may graduate with one of the following awards:

Master of Education (M.Ed.) in Literacy

This specialization develops advanced expertise in literacy instruction and assessment, with a focus on reading, writing, speaking, and listening across diverse learning contexts. Graduates are prepared for roles such as literacy specialists, reading coaches, instructional leaders, and curriculum coordinators.

Master of Education (M.Ed.) in School Guidance and Counselling

This specialization prepares educators to serve as professional school counsellors within K–12 settings. It emphasizes counselling theory, ethical and legal practice, child and adolescent development, and the organization of effective school counselling programmes.

Master of Education (M.Ed.) in Curriculum, Instruction and Technology

This specialization prepares educators to design, implement, and evaluate curriculum and instructional strategies that meaningfully integrate technology. Graduates are equipped to lead technology-enhanced learning initiatives and support professional development in educational organizations.
